Manual

Download the code by running:

"git clone https://gitlab.liu.se/vicny135/networks.git "

in the command prompt in the directory of your choosing.

Run the program. Accomplish this by opening the command prompt and entering

% *python3 RouterSimulator.py -c true -p true -n 3*, where c is link cost change (**on**/off), and p is poison reverse (**on**/off), and n is number of nodes (**3**, 4, 5).

Now the results should be displayed in n + 1 windows.
